How to use this map

- The main map shows the designated road freight network for County Durham. It is expected that drivers will use this network to access freight destinations within County Durham, wherever possible.
- The map also includes a series of more detailed inset maps for the main towns. Preferred routes are also identified to those destinations.
- Bridge height and weight restrictions are shown for the identified freight network and for access roads around key destinations. It should be noted that there are many restrictions on other parts of the road network that are not represented.
- The list of freight origins and destinations is not exhaustive. It focuses on industrial estates, employment parks and retail parks where multiple users will be involved. We welcome feedback from users of this map regarding additional locations which may be added to subsequent editions.

Comments and Feedback

We would welcome feedback on this map and suggestions of improvements that could be made to future editions. Please send your comments by email to ltp@durham.gov.uk
